

40. The method according to claim 39, wherein the spraying step includes spraying a material through a spraying head, the material being in the form of one of a powder, a slurry and a solution.
41. The method according to claim 39, further including the step of cooling the substrate.
42. The method according to claim 39, wherein the cooling is with a cryogenic liquid.

### REMARKS

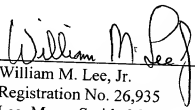

The above amendments are being made in order to substitute claims in accordance with U.S. practice and eliminate multiple dependency currently appearing in the international application.

The International Preliminary Examination Report reaches the conclusion that the claims meet the requirements of novelty and inventive step (non-obviousness). It is submitted that the same result should occur in the United States.

Examination of the application on its merits is awaited.
